

JOIN THE NATIONAL WEEK OF ACTION TO **SHUT DOWN ICE**

OCTOBER 4TH TO 9TH

ICE's national surveillance nerve center is located in Vermont – surveillance conducted in Vermont enables ICE to target, track, and violently detain people across the country. By concentrating our energy and numbers against the infrastructure ICE needs to conduct deportations, we can reduce their capacity for harm and prevent future deportations. Join us in Vermont or take action locally. Together, we can shut them down
